

HEART DISEASE

Roughly a third of all deaths around the world are the result of heart disease and stroke, making cardiovascular disease the number one killer globally and among indians. Trends in cardiovascular disease mortality are no longer declining for most parts of india despite widespread availability of facilities. This is mainly due to rise in number of patients and significant risk factor burden.

Risk factors are high blood pressure, poor diet, high cholesterol, tobacco smoking, excessive alcohol use and lack of exercise .

Many of the fatalities and burden of heart disease is preventable by proper preventive approaches and early detection and treatment.

At heart, we at KDCH believe in prompt and early detection and treatment of heart disease and give timely advice and treatment to one and all in a most affordable and heartly manner.

Coronary care unit

Separate interventional and coronary care unit with total bed strength of 10 and continuous hemodynamic and noninvasive monitoring. Full fledged supporting critical care ICU for multidisciplinary care.

Preventive cardiology services

Preventive checkup packages including cardiac risk assessment and evaluation. Includes ECG, non invasive stress testing(TMT) 3D echocardiography and laboratory evaluation of modifiable risk factors. (Lipid profile, Blood sugar with glycated Hemoglobin, Carotid doppler)

KDCH
SAHRIDAYA
CARDIO CARE

SERVICES OFFERED

- ◆ Cardiology emergency department with round the clock facility for primary angioplasty
- ◆ Rest and Exercise ECG
- ◆ Holter Monitoring
- ◆ Echocardiography with full volume 3D echocardiography
- ◆ Pediatric echocardiography and foetal echocardiography
- ◆ Transesophageal echo with 3D probe
- ◆ Cardiac catheterisation, coronary, peripheral and carotid angioplasty
- ◆ PCI optimisation with FFR and vascular imaging
- ◆ Congenital heart disease intervention
- ◆ Permanent and temporary pacemaker implantation

DEPARTMENT OF CARDIOLOGY & INTERVENTIONAL CARDIOLOGY

KOZHIKODE DISTRICT CO-OPERATIVE HOSPITAL

Team 'Sahridaya'

Trained and dedicated cardiac team involving Doctors, Critical care specialist, Intensive care nurses and cathlab staff for prompt, affordable and humanitarian care.

Our Team of Doctors

Dr. Rajeev E

MD, DNB, DM (Cardio) FACC, FSCAI

Senior Consultant and Head of department.

Dr Rajeev is a renowned interventional cardiologist who has more than 15 years of experience in interventional cardiology and has treated many with coronary and non coronary interventions. He is the head of division of Cardiology. Dr Rajeev hails from Calicut.

He has finished basic training from Calicut Govt medical college, MBBS and MD in General Medicine and subsequently had training in Cardiology at the Prestigious Sree Chitra Institute where he got his DM degree in cardiology. Subsequently he has worked in Sree chitra Trivandrum as Asst professor, and at MES medical college before assuming charge at KDCH. He has had training abroad in advanced interventions at university of Turin, Italy and has been awarded fellowship of the Society of Cardiac Angiography and interventions and the fellowship of American College of Cardiology. Has authored two books for patient education.

Areas of interest: Interventions in acute coronary syndromes, Complex lesions-bifurcation disease Peripheral and Carotid intervention, Foetal echocardiography

Professional Affiliations:

Member - IMA, Cardiological Society of India, Indian College of Cardiology
Fellowship - Indian college of Cardiology, American College of Cardiology and European Society of Cardiology

OPD on all week days except Friday. Both before noon and afternoon
OPD timings as per appointment.

Dr Suneesh Kalliath

MD (Gen Medicine-AIIMS, New Delhi), DNB (Med), DM (Cardiology), DNB (Cardiology)

Consultant Interventional Cardiologist

Dr Suneesh is a dynamic young interventional cardiologist with deep professional commitment and compassion. He is a graduate of Government medical college Calicut (2009). He has had a bright academic career and finished his MD training at prestigious All India Institute of Medical Sciences, New Delhi (2013). After MD, he has worked as Senior Resident in the department of Cardiology at AIIMS. He did his DM in Cardiology from Government medical college, Calicut (2017). After finishing DM, he has worked at Government Medical College Calicut as Assistant Professor in Cardiology (2017-2018). During this period, he has performed and assisted several primary and elective angioplasties, peripheral interventions, pacemaker and ICD implantations, balloon valvotomies and device closures for congenital heart defects. He has gained training for complex interventions like EVAR, OCT and IVUS guided complex PCI, interventions for CTO and advanced procedures like TAVR. He is keenly interested in interventions of acute MI, complex coronary interventions, PCI of CTO and pacemaker/device therapy for rhythm disorders. He has special interest in coronary imaging (IVUS and OCT) and heart failure management.

Professional affiliations: Member-IMA, Cardiological Society of India.

OPD on all week days. Both fore noon and afternoon
consultations available as per appointment.

Dr. Jayesh Bhaskaran

MD, DNB, DM

Senior consultant Cardiologist - Visiting Consultant

Dr Jayesh is well known cardiologist and interventionist in Malabar region and has been long associated with KDCH and is available for consultation with prior appointment.

Dr Jayesh is vastly experienced in coronary and non coronary interventions and has had training extensively in complex interventions and chronic total occlusions. His area of interest apart from coronary interventions are structural heart disease interventions, aortic aneurysm endovascular treatment and hybrid procedures.

His OP days are Monday and Friday afternoons.

EQUIPMENTS

- GE INNOVA IGS 520 CATH LAB with PCI assist package and integrated CT & 3D spin - The most advanced machine for patient care from GE Healthcare.
- Philips Epiq7 3D echocardiography machine with 3D TEE facility
- Philips CX50 portable high definition echo for bedside imaging of the critically ill
- Multichannel Holter recording (Mortara inc) with recording upto 7days
- Dedicated stress test with wireless ECG reception for artefact free interpretation
- Intraaortic balloon pump with fibre-optic connectivity
